

AD _____

GRANT NUMBER DAMD17-97-1-7332

TITLE: Conference on Current Issues of Chemical Mixtures

PRINCIPAL INVESTIGATOR: Raymond S. Yang, Ph.D.

CONTRACTING ORGANIZATION: Colorado State University
Fort Collins, Colorado 80523

REPORT DATE: November 1998

TYPE OF REPORT: Final Proceedings

PREPARED FOR: U.S. Army Medical Research and Materiel Command
Fort Detrick, Maryland 21702-5012

DISTRIBUTION STATEMENT: Approved for public release;
distribution unlimited

The views, opinions and/or findings contained in this report are those of the author(s) and should not be construed as an official Department of the Army position, policy or decision unless so designated by other documentation.

REPORT DOCUMENTATION PAGE			Form Approved OMB No. 0704-0188	
Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.				
1. AGENCY USE ONLY (Leave blank)	2. REPORT DATE November 1998	3. REPORT TYPE AND DATES COVERED Final Proceedings (1 Jul 97 - 30 Sep 98)		
4. TITLE AND SUBTITLE Conference on Current Issues of Chemical Mixtures		5. FUNDING NUMBERS DAMD17-97-1-7332		
6. AUTHOR(S) Yang, Raymond S., Ph.D.				
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) Colorado State University Fort Collins, Colorado 80523		8. PERFORMING ORGANIZATION REPORT NUMBER		
9. SPONSORING / MONITORING AGENCY NAME(S) AND ADDRESS(ES) U.S. Army Medical Research and Materiel Command Fort Detrick, Maryland 21702-5012		10. SPONSORING / MONITORING AGENCY REPORT NUMBER		
11. SUPPLEMENTARY NOTES		19990125 042		
12a. DISTRIBUTION / AVAILABILITY STATEMENT Approved for public release; distribution unlimited		12b. DISTRIBUTION CODE		
<p>Between 11 and 13 August 1997, a conference on <i>Current Issues of Chemical Mixtures</i> was held and hosted at Fort Collins, Colorado, by the Colorado State University (CSU) and the National Institute of Environmental Health Sciences (NIEHS) Superfund Basic Research Program (SBRP). Other sponsors of the conference included the Agency for Toxic Substances and Disease Registry (ATSDR), the U. S. Environmental Protection Agency (both the Office of Solid Waste and Emergency Response and the Region VIII Office), the U. S. Army Center for Environmental Health Research, and the Electric Power Research Institute (EPRI). Over 160 participants, coming from Canada, France, Germany, Japan, Mexico, the Netherlands, Norway, Sweden, and the U. S., are scientists, engineers, policy makers, and individuals with a profound interest in the issues related to hazardous waste disposal and contamination. The Conference consisted of six sessions: (1) Overview of Human Health and Regulatory Problems Related to Chemical Mixture Exposures; (2) Biomedical Advances on Chemical Mixtures I; (3) Biomedical Advances on Chemical Mixtures II; (4) Methodological Advances on the Toxicology of Chemical Mixtures; (5) Ecological and Engineering Advances on Chemical Mixture Research; and (6) Risk Assessment Issues Related to Hazardous Waste Chemical Mixtures.</p>				
14. SUBJECT TERMS		15. NUMBER OF PAGES 5		16. PRICE CODE
17. SECURITY CLASSIFICATION OF REPORT Unclassified	18. SECURITY CLASSIFICATION OF THIS PAGE Unclassified	19. SECURITY CLASSIFICATION OF ABSTRACT Unclassified	20. LIMITATION OF ABSTRACT Unlimited	

FOREWORD

Opinions, interpretations, conclusions and recommendations are those of the author and are not necessarily endorsed by the U.S. Army.

☒ Where copyrighted material is quoted, permission has been obtained to use such material.

N/A Where material from documents designated for limited distribution is quoted, permission has been obtained to use the material.

☒ Citations of commercial organizations and trade names in this report do not constitute an official Department of Army endorsement or approval of the products or services of these organizations.

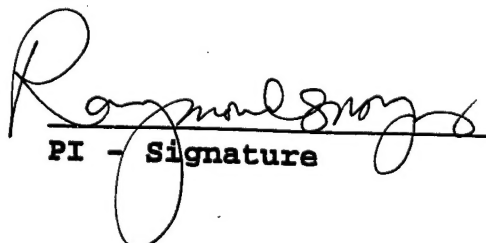

☒ In conducting research using animals, the investigator(s) adhered to the "Guide for the Care and Use of Laboratory Animals," prepared by the Committee on Care and use of Laboratory Animals of the Institute of Laboratory Resources, national Research Council (NIH Publication No. 86-23, Revised 1985).

N/A For the protection of human subjects, the investigator(s) adhered to policies of applicable Federal Law 45 CFR 46.

N/A In conducting research utilizing recombinant DNA technology, the investigator(s) adhered to current guidelines promulgated by the National Institutes of Health.

N/A In the conduct of research utilizing recombinant DNA, the investigator(s) adhered to the NIH Guidelines for Research Involving Recombinant DNA Molecules.

☒ In the conduct of research involving hazardous organisms, the investigator(s) adhered to the CDC-NIH Guide for Biosafety in Microbiological and Biomedical Laboratories.

Volume 106, Supplement 6, December 1998

Current Issues on Chemical Mixtures

Preface	1261
<i>Raymond S.H. Yang and William A. Suk</i>	

Overview of Human Health and Regulatory Policy Issues on Chemical Mixtures

Human Health and Chemical Mixtures: An Overview	1263
<i>David O. Carpenter, Kathleen F. Arcaro, Brian Bush, William D. Niemi, Shaokun Pang, and Dilip D. Vakharia</i>	
Public Health Challenges Posed by Chemical Mixtures	1271
<i>Hugh Hansen, Christopher T. De Rosa, Hana Pohl, Michael Fay, and Moiz M. Mumtaz</i>	
Toxicology of Chemical Mixtures: International Perspective	1281
<i>Victor J. Feron, Flemming R. Cassee, and John P. Groten</i>	
Maximum Workplace Concentration Values and Carcinogenicity Classification for Mixtures	1291
<i>Rüdiger Bartsch, Stephan Forderkumz, Ulrike Reuter, Heidrun Stenzl-Eckert, and Helmut Greim</i>	

Biomedical and Methodological Advances on Chemical Mixtures

Commentary: Current Approaches toward Chemical Mixture Studies at the National Institute of Environmental Health Sciences and the U.S. National Toxicology Program	1295
<i>John R. Bucher and George Lucier</i>	
Environmental Complex Mixture Toxicity Assessment	1299
<i>Henry S. Gardner Jr., Linda M. Brennan, Margaret W. Toussaint, Alan B. Rosencrance, E. Maxine Boncavage-Hennessey, and Marilyn J. Wolfe</i>	
Role of Tissue Repair in Toxicologic Interactions among Hepatotoxic Organics	1307
<i>Madhusudan G. Soni and Harihara M. Mehendale</i>	
Interactive Toxicity and Stress Protein Expression by Vinylidene Chloride and Monochloroacetate in Precision-Cut Rat Liver Slices	1319
<i>Jayanthika Wijeweera, Jay Gandolfi, and Xing Hui Zheng</i>	
Tumors and DNA Adducts in Mice Exposed to Benzo[a]pyrene and Coal Tars: Implications for Risk Assessment	1325
<i>Lawrence S. Goldstein, Eric H. Weyand, Stephen Safe, Michael Steinberg, Sandra J. Gulp, David W. Gaylor, Frederick A. Beland, and Lewis V. Rodriguez</i>	
Medium-Term Bioassays for Carcinogenicity of Chemical Mixtures	1331
<i>Nobuyuki Ito, Katsumi Imaida, Masao Hirose, and Tomoyuki Shirai</i>	
Lung Tumorigenic Interactions in Strain A/J Mice of Five Environmental Polycyclic Aromatic Hydrocarbons	1337
<i>Stephen Nesnow, Marc J. Mas, Jeffrey A. Ross, Anthony J. Galati, Guy R. Lambert, Chris Gennings, Walter H. Carter Jr., and Gary D. Stoner</i>	
Comparative Estrogenic Activity of Wine Extracts and Organochlorine Pesticide Residues in Food	1347
<i>Kevin Gaido, Linda Dohme, Fan Wang, Ichen Chen, Barry Blankvoort, Kavita Ramamoorthy, and Stephen Safe</i>	
Estimation of Toxicity of Chemical Mixtures through Modeling of Chemical Interactions	1353
<i>M.M. Mumtaz, C.T. De Rosa, J. Groten, V.J. Feron, H. Hansen, and P.R. Durkin</i>	
Statistically Designed Experiments to Screen Chemical Mixtures for Possible Interactions	1361
<i>John P. Groten, Osamu Tajima, Victor J. Feron, and Eric D. Schoen</i>	
A Nonlinear Isobologram Model with Box-Cox Transformation to Both Sides for Chemical Mixtures	1367
<i>Ding G. Chen and Joel G. Pounds</i>	
Mixture Design and Multivariate Analysis in Mixture Research	1373
<i>Ingvar Eide and Hanne Greiff-Johnsen</i>	
Physiological Modeling of Toxicokinetic Interactions: Implications for Mixture Risk Assessment	1377
<i>Sami Haddad and Kannan Krishnan</i>	
Approaches to Developing Alternative and Predictive Toxicology Based on PBPK/PD and QSAR Modeling	1385
<i>Raymond S.H. Yang, Russell S. Thomas, Daniel L. Gustafson, Julie Campain, Stephen A. Benjamin, Henk J.M. Verhaar, and Moiz M. Mumtaz</i>	

Contents, continued

Ecological and Engineering Advances on Chemical Mixtures

Molecular and Genetic Ecotoxicologic Approaches to Aquatic Environmental Bioreporting	1395
<i>Barry J. Beary, William C. Black, Jonathan O. Carlson, William H. Clements, Nancy DuTeau, Elizabeth Harraby, Jay Nuckols, Kenneth E. Olson, and Alfredo Rayms-Keller</i>	
Altered Biologic Activities of Commercial Polychlorinated Biphenyl Mixtures after Microbial Reductive Dechlorination	1409
<i>Mahmoud A. Mousa, Patricia E. Ganey, John F. Quensen III, Burra V. Madhukar, Karen Chou, John P. Giesy, Lawrence J. Fischer, and Stephen A. Boyd</i>	
Using Metal-Ligand Binding Characteristics to Predict Metal Toxicity: Quantitative Ion Character-Activity Relationships (QICARs)	1419
<i>Michael C. Newman, John T. McCloskey, and Christopher P. Tazara</i>	
Genotoxicity of Bioremediated Soils from the Reilly Tar Site, St. Louis Park, Minnesota	1427
<i>Thomas J. Hughes, Larry D. Claxton, Lance Brooks, Sarah Warren, Richard Brenner, and Fran Kremer</i>	
Bioassay-Directed Fractionation and Chemical Identification of Mutagens in Bioremediated Soils	1435
<i>Lance R. Brooks, Thomas J. Hughes, Larry D. Claxton, Barry Austern, Richard Brenner, and Fran Kremer</i>	
Modeling the Chemistry of Complex Petroleum Mixtures	1441
<i>Richard J. Quann</i>	

Model Validation Concepts and Their Application to Lead Models

Preface	1451
<i>Lester D. Grant, Robert W. Elias, and Allan H. Marcus</i>	
Evaluation (Not Validation) of Quantitative Models	1453
<i>Naomi Oreskes</i>	
Historical Perspective on Lead Biokinetic Models	1461
<i>Michael Rabinowitz</i>	
Uses and Limits of Empirical Data in Measuring and Modeling Human Lead Exposure	1467
<i>Paul Mushak</i>	
Predicting Blood Lead Concentrations from Lead in Environmental Media	1485
<i>Kathryn R. Mahaffey</i>	
A Physiologically Based Kinetic Model for Lead in Children and Adults	1495
<i>Ellen J. O'Flaherty</i>	
The ICRP Age-Specific Biokinetic Model for Lead: Validations, Empirical Comparisons, and Explorations	1505
<i>Joel G. Pounds and Richard W. Leggett</i>	
The Conceptual Structure of the Integrated Exposure Uptake Biokinetic Model for Lead in Children	1513
<i>Paul D. White, Patricia Van Leeuwen, Barbara D. Davis, Mark Maddaloni, Karen A. Hogan, Allan H. Marcus, and Robert W. Elias</i>	
Structure, Use, and Validation of the IEUBK Model	1531
<i>Marlin H. Mickle</i>	
Measurement Error, Biases, and the Validation of Complex Models for Blood Lead Levels in Children	1535
<i>Raymond J. Carroll and Christian D. Galindo</i>	
Some Useful Statistical Methods for Model Validation	1541
<i>Allan H. Marcus and Robert W. Elias</i>	
The Integrated Exposure Uptake Biokinetic Model for Lead in Children: Independent Validation and Verification	1551
<i>Larry Zaragoza and Karen Hogan</i>	
Integrated Exposure Uptake Biokinetic Model for Lead in Children: Empirical Comparisons with Epidemiologic Data	1557
<i>Karen Hogan, Allan Marcus, Roy Smith, and Paul White</i>	
Blood Lead Slope Factor Models for Adults: Comparisons of Observations and Predictions	1569
<i>Teresa S. Bowers and Joshua T. Cohen</i>	
An Empirical Comparison of Lead Exposure Pathway Models	1577
<i>Paul Succop, Robert Bornschein, Katie Brown, and Chih-Yu Tseng</i>	
Roles of Lead-Binding Proteins in Mediating Lead Bioavailability	1585
<i>Bruce A. Fowler</i>	
Bioavailability of Soilborne Lead in Adults, by Stable Isotope Dilution	1589
<i>Mark Maddaloni, Nancy Lofacono, William Manton, Conrad Blum, John Drexler, and Joseph Graziano</i>
